# User manual and Bluetooth pairing

- Insert two bulbs on E27 lamp holders, make sure tighten fixed. In order to reach the best stereo sound effects, install two bulbs between distance 1.5~5 meters.
- Bedroom, living room, cafe, bar, no matter where you are, can enjoy the wonderful music any time. No need complicated cable connect or batteries, simply plug in the lamp socket.

**Our factory configuration have been paired successful for the two brothers bulbs.**
**Users only need to follow up below operate below 2 step for Bluetooth Pairing.**

1. Insert two bulbs on E27 lamp holders. Turn ON the power at same time. After about 3seconds, you will hear “DO,DO,DO” & “Di, Di, Di” sounds from two bulbs, that means two bulbs are pairing automatically. After about 10-20 seconds, two bulbs paired successful, then no sounds happen.
2. Point at any one bulb, press

, you will hear “Di” sound, then search Bluetooth name “BT-Speaker 1+1” from your device (such as Mobile), pairing with it. Then play music from your mobile. You can enjoy music from the bulbs now.

■ If you want to pairing difference bulbs, we have not paired them before, yyou need to do below steps for brothers bulbs pairing at first:

1) Point at bulb #1, press

hold for several second, until hear “Di” sound.

2) Point at bulb #2, press

hold for several second, until hear “Di” sound.

3) Point at bulb #1, press

hold for several second, until hear “Di” sound.

4) Point at bulb #2, press

hold for several second, until hear “Di” sound.

Waiting for 5~10 seconds, you will hear “DO,DO,DO” sounds from two bulbs, that means two bulbs are pairing now. After about 20-30 seconds, two bulbs paired successful and no sound.
